

# COLLECTION DERBY

## FABRIC TECHNICAL DATA

- a) fabric composition: 100% Polyester
- b) weight: 559 g/sqm
- c) abrasion resistance (Martindale test): 40.000 Martindale cycles
- d) pilling resistance (1-5): 4-5, A cat.
- e) fastness to light (1-8): 4-5, A cat.

## CHARACTERISTICS:

Soft, nice in touch

Gentle, irregular structure imitating natural leather

Delicate texture and two shades of the surface give it a noble look

Breathability and high comfort of use in every season of the year

Easy to clean, does not attract dust

Anti-frayed, pilling-resistant

## MAINTENANCE:

The Derby fabric is very comfortable in use.

To keep it in good condition we suggest vacuum cleaning with a soft nozzle.

In case any slight stains appear the fabric should be immediately wiped with a dry cloth. Avoid an excessive rubbing against a damp fabric.

A thorough cleaning or removing substantial dirt should be assigned to professional maintenance services companies. A proper maintenance of the fabric is one of key warranty conditions; any treatments damaging the fabric surface constitute grounds for the rejection of possible complaints.

During use the fabric may stretch gently while its fiber may rise a little making it resembles velvet; this is not a defect of the fabric but its natural feature.

Shades of fabric swatches and those of a furniture covering may vary slightly, that is why each piece of furniture is fitted with a fabric sample to match the right shade in case of the claim.

## APPLICATION:

The Derby fabric has excellent physical-mechanical qualities what ensures its versatile application. It perfectly sticks to the furniture surface. It is particularly used for sofas bases and armrests. Thanks to its softness and breathability it also can be used for seats and backrests. The velvety, soft surface looks splendidly on both classic and modern modules. Its universal qualities make it suitable for any kind of furniture including this one fitted with moveable elements such as headrests, armrests or recliners.
